WEST VIRGINIA BULLETIN NO: WV210-7-1

SUBJECT: ENG – Available Engineering Programs and revision of the Engineering Job Approval Chart.

Purpose: To inform employees of certified engineering programs available from the Common Computing Environment and to advise that the Engineering Job Approval Chart has been revised.

Expiration Date: December 29, 2007

The engineering programs listed below may be downloaded from the Common Computing Environment Certified for XP Workstations with the associated Resource Conservation Engineer's approval. It is the responsibility of the individual that has the program installed on their system to assure that the most current program is installed/updated as needed. Contact IT Staff to install the program(s) on your computer by submitting a Magic Ticket and noting the RCE's approval.

E-mails or notices will continue to be sent when programs are updated or temporarily suspended.

Currently West Virginia is using the following certified programs from the Common Computing Environment:

- Ohio Engineering Programs 5.2.2
- EFH2 1.1
- AWM-2.2.0.1
- Hydraulics Formula 2.2.1.1
- WIN Pond 2005 1.0
- Win TR55 1.00.08

The West Virginia [Engineering Job Approval Chart \(WV-ENG-26\)](#) has been revised, and is now form fillable. The RCE should review and update all engineering job approvals with the appropriate personnel. The fillable form will be sent to the RCE's for their use and is attached to this bulletin.
